

# FRC Kickoff 2026: Rebuilt

January 13th

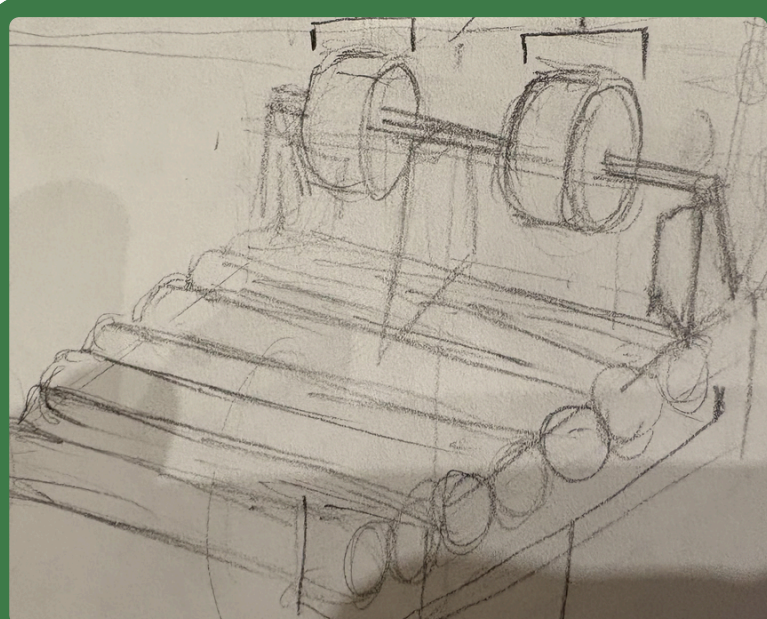

QUICKSTRIKE NIAGARA

TEAM 6978

Thank you for all your support of our team! Without your sponsorship, this build season would not be possible.  
Here is what we have been working on over the past week.

## Kickoff Day One

For day one of kickoff our team met bright and early to prepare for the upcoming season, doing last minute checks of inventory and general organization. After the new game, Rebuilt, was announced, we immediately got to brainstorming and sketching out concepts for a robot.

## Kickoff Day Two

We continued brainstorming with several members of our team working together to present their ideas to the team.  
We started building the new field and testing our swerve drive on it, and planning our design intuitively.

## Prototyping

This coming Tuesday, we are planning on improving and building prototypes of different designs that we have settled on. As well as continuing to build different field obstacles to test our prototype.

## REBUILT 2026

Here is the Youtube link for those who want to watch the official premiere of this seasons competition!
