QUICKSTRIKE NIAGARA

TEAM 6978

Thank you for all your support of our team! Without your sponsorship, this build season would not be possible. Here is what we have been working on over the past week.

Keeping things moving

Our lead programming mentor is teaching new students the ins and outs of Java, our chosen programming language, as well as giving out homework to make sure that our programming team is ready for the new season!

Media

Our media team is taking a more forward approach this season, working hard to broaden our outreach and make our social media presence more known within the FRC community.

Build Team

Our building team continues to update and test a new shooter for the STEMley Cup, whilst also documenting what materials we have, and what we will need for the new season. We are still using last seasons robot to test new build ideas, and make sure that we will be able to use it as a backup for the STEMley Cup.

Creativity

New members and returning members are working together to create new ideas, designs, and fun things to do while excitedly awaiting the new season.
